DETAILED ACTION

Applicants' response which included a request for reconsideration filed on 12/14/2004, is made of record.

Claims 1-5 are pending.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

In view of applicants' response, particularly showing that instant process which involves a sulfonation with sulfuric acid leads a overall improved yield of 77 % as compared to prior are process of 41 %, the 103 rejection of claims 1-5 over Niewohner et al. WO 99/24433 in view of Dale et al. Organic Process Research & Development 4, 17-22, 2000., and Knaggs et al. in Sulfonation, Kirk-Othmer Encyclopedia of Chemical Technology, 1-13, 2000, made in the previous office action is deemed as obviated.

The process for the preparation sulfonamide substituted imidazotriazinone of formula I by a three step process wherein the first step involves sulfonation with sulfuric acid followed by treatment with thionyl chloride in the second step to make a sulfonyl chloride and then treatment with appropriate amine to make the sulfonamide as embraced in the instant claims was not found to be anticipated or rendered obvious by the prior art of record. Additional search in the related art area also did not yield any prior art disclosing use of the three step process for making the imidazotriazinone of formula I embraced herein Therefore, the examiner noted that the claims 1-5 would be in condition for allowance.
